135 Folly Mill Road  
Seabrook, NH 03874

Quinn, KJ & Co, Seabrook

Dear Sir or Madam:

You are invited to attend an Open House sponsored by the U.S. Environmental Protection Agency (EPA) New England office. The Open House will be held at the Kimball-Jenkins Estate, Carriage House Community Center, 266 North Main Street, Concord, NH from 1 pm to 7 pm, Wednesday, April 24, 1996. Formal presentations (at 2:30 pm with a brief summary presentation at 6:00 pm) will introduce recent changes in the federal Superfund program which allow the states greater authority in addressing hazardous waste sites. The presentations will also describe the New Hampshire Department of Environmental Services (NH DES) state sites waste program.

This Open House is an opportunity for owners and operators of properties listed in the EPA Superfund program inventory of known and suspected hazardous waste disposal sites (the Comprehensive Environmental Response, Compensation and Liability Information System, or CERCLIS) to meet informally with federal and state program staff. EPA and NH DES staff will be available throughout the Open House to meet with you and answer your specific questions. EPA files for CERCLIS sites in New Hampshire will also be available for review.

CERCLIS site owners and operators, concerned citizens, local officials and all other interested parties are invited to learn more about the federal Superfund Site Assessment program and new program Initiatives which may effect you, as well as New Hampshire's hazardous waste program for uncontrolled hazardous substance sites.

Enclosed you will find a listing of the New Hampshire properties included in EPA New England's "active" CERCLIS inventory. Notations for each entry indicate the current site status and which agency (NH DES or EPA) has assumed the lead for further site evaluations.

If you have any questions regarding the Open House, you may reach me at 617 573-9648, or Charlie Berube of the NH DES at 603 271-2912.

Sincerely,

Don Smith  
Site Assessment Manager  
Office of Site Remediation and Restoration
